**Subject:** FW: ARSG Communication: Red and Bonita Mine Bulkhead and April Mtg

Hello Pete,

This is just for your information regarding my communication with Peter Butler who represents ARSG in general communication with EPA. Specifically I offered to discuss the Red and Bonita work in early April if there was a need, but I could not attend the April meeting and I planned a detailed presentation to the group in May.

I received no indication that anyone in the ARSG group was concerned about receiving an update prior to that. Also, some of the details that I would like to be able to share will in fact not be confirmed until mid May.

Anyway, this for your use and to set the record a little more straight versus the apparent representations during the meetings this week, which I could not attend.

Sincerely,

Steve

Peter,

The days have gotten away from me in terms of returning your call. So, I wanted to send a quick note, but I am happy to talk next week if you would like to discuss this more. In short, the following updates are provided in answer to your voicemail questions:

1. Red and Bonita bulkhead planning is underway and we have budgeted that work for this year.
2. The bulkhead design includes a piping component to allow for potential future injection of insitu treatment reagents.
3. Gold King Mine adit rehab work is also scheduled for this year. I have discussed this with Todd Hennis also.
4. I do not have plans to attend the April 28<sup>th</sup> ARSG meeting, but Allen Sorenson, DRMS and I have set aside the time in May to attend the ARSG meeting and go over the design and plans for the R n B, etc.

Please let me know the date for the May ARSG meeting. If you would like to discuss this further, please let me know a time next week that I could call you.

Sincerely,

Steve
